Preamble

Understanding Intratec Energy Prices & Markets Program

Amid a global push for renewable sources and ever-evolving geopolitical dynamics, energy markets have never been more complex or unpredictable. Shifting trade alliances, supply chain disruptions, and volatile pricing trends create a landscape that demands constant monitoring and strategic foresight.

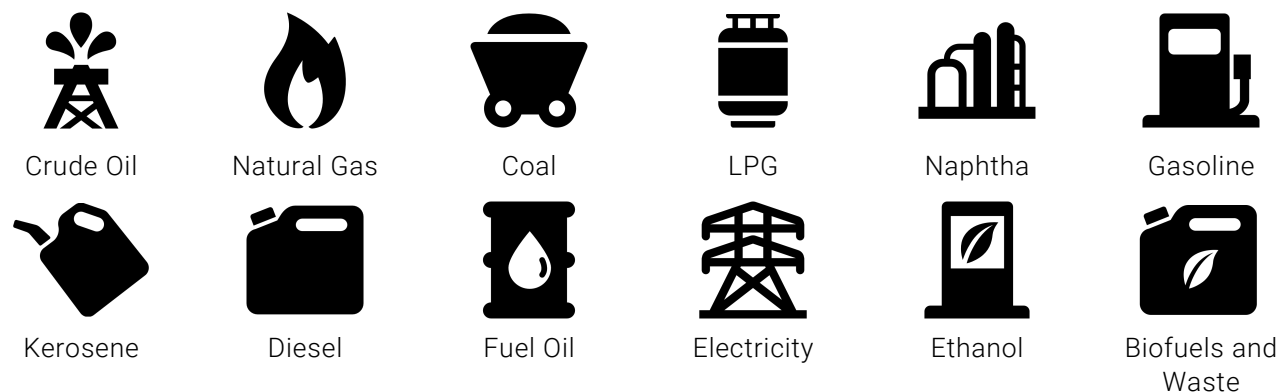

To help businesses and decision-makers navigate such uncertainties, we designed the Intratec Energy Prices & Markets, a subscription-based program that provides monthly reports with comprehensive and up-to-date assessments into the energy prices and markets worldwide.

Each report helps subscribers answer essential questions around a country's energy market, such as:

- * How have energy prices changed historically, and recently?
- * What are the price forecasts for energy commodities?
- * How do local energy prices compare to global market prices?
- * What are the key trends in the country's energy production and consumption?
- * How are freight and insurance costs affecting the competitiveness of energy imports and exports?
- * To what extent is the country self-sufficient in energy production?
- * Which countries are its main energy trade partners, and how reliant is it on energy imports or exports?
- * How exposed is the country to financial or supply risks in its energy trade relationships?

Commodities Approached by Report

Every report under Intratec Energy Prices & Markets program includes price and market assessments on essential energy commodities:

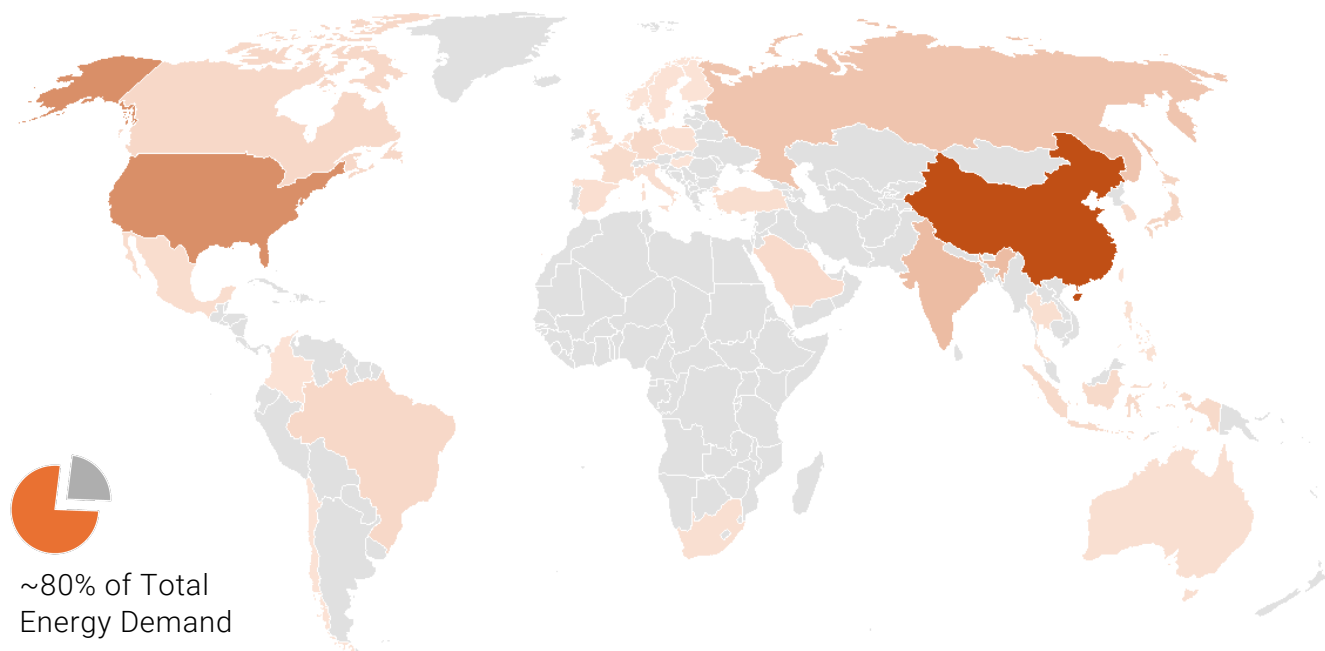

Each report is focused on a specific country. Subscribers receive new PDF reports every month, featuring the latest data and analyses, allowing them to stay informed about market trends.

Available Reports

The Intratec Energy Prices & Markets program offers a selection of 33 country-specific reports, allowing subscribers to choose the countries that matter most to them. Upon subscription, they can tailor the coverage to their specific needs and receive only the selected reports monthly.

Such selection of countries covered in the program encompasses key players in the global energy landscape. These countries collectively account for significant shares of global energy production and demand, ensuring that subscribers gain insights into the most relevant markets influencing supply chains, price dynamics, and industry trends.

How the Program is Organized

Each Intratec Energy Prices & Markets report is dedicated to a specific country, delivering in-depth analyses tailored to the selected location. The scope and depth of insights vary according to the subscription plan, ensuring that subscribers receive the level of detail that best suits their needs. Reports are released at the beginning of each month, providing timely updates on energy prices, forecasts, market trends, and key trade dynamics.

To ensure clarity and consistency, each report follows a structured identification format, which includes a unique code representing the subscription plan, the country covered, the release month and year, and the Intratec Energy Prices & Markets program designation:

About this Document

This guide is focused on South Korea and was released on October 2025 as part of the Intratec Energy Prices & Markets program. Its purpose is to present and describe the full range of assessments provided by Intratec for this country, offering a clear overview of the scope covered in our monthly reports. The assessments are structured into the following sections:

- * Price Assessments: Historical prices, recent trends, and short-term forecasts
- * Freight Assessments: Transportation costs for energy imports and exports.
- * Insurance Assessments: Insurance rates impacting energy trade.
- * Market Analysis Assessments: Key indicators of local energy production and demand.
- * Energy Self-Sufficiency and Trade Dependencies: Energy balances and trade reliance.
- * Global Comparison: Benchmarking against global energy prices and trends.

Assessment Definitions

The following pages present the basis of assessments covered in Intratec Prices & Markets. In short, for each assessment, the most likely commodity specification is provided, along with its delivery methods (PDF report, API, Excel and/or Power BI) and the unique assessment code used for identification. The assessment history is also outlined, indicating the time frame for which these evaluations are available, followed by the lag of each assessment (i.e., the number of months during which the preliminary price of a commodity is provided, rather than its final price).

It is important to highlight that Intratec may retire, add, or change an assessment in accordance with our commitment to relevant prices and market or country practices. For more information, the reader is referred to the section “*Disclaimers – Assessment Addition, Retirement, and Changes*” in *Intratec Energy Prices & Markets – General Methodology Guide*, available at:

Price Assessments

Butane, n-, imp, spot, cfr, South Korea

Specification:	n-butane content > 94.0 vol% and isobutane content < 6.0 vol%
Typical packing:	bulk
Density Net calorific value:	599 kg/m3 46.2 GJ/mt
Pricing type Market:	spot import
Incoterm Location:	cfr South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Pricing model:	Freight Based Calculation
Assessment chart legend:	Butane (n-), imp, KR
Final Forecast:	Jan/07-Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	132760-8-5

Butane, whl, spot, ddp, South Korea

Typical specification:	n-butane, isobutane, and mixtures of these compounds
Typical packing:	bulk
Density Net calorific value:	599 kg/m3 46.2 GJ/mt
Pricing type Market:	spot wholesale
Incoterm Location:	ddp South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Pricing model:	Compiled Prices
Assessment chart legend:	Butane, whl, KR
Final Preliminary Forecast:	Jan/07-Aug/25 Sep/25 No forecast
Delivery method(s):	PDF API Excel Power BI
Assessment code:	0527884-8-5

Coal, Anthracite, imp, transaction, cif, South Korea

Specification:	unspecified anthracite
Typical packing:	bulk
Density Net calorific value:	1,050 kg/m3 29.7 GJ/mt
Pricing type Market:	transaction import
Incoterm Location:	cif South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Assessment chart legend:	Coal (Anthracite), imp, KR
Final Preliminary Forecast:	Jan/07-Aug/25 Sep/25 No forecast
Delivery method(s):	PDF API Excel Power BI
Assessment code:	4339626-8-5

Coal, bituminous, imp, transaction, cif, South Korea

Specification:	unspecified bituminous
Typical packing:	bulk
Density Net calorific value:	850 kg/m3 24.1 GJ/mt
Pricing type Market:	transaction import
Incoterm Location:	cif South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Assessment chart legend:	Coal (bituminous), imp, KR
Final Preliminary Forecast:	Jan/07-Aug/25 Sep/25 No forecast
Delivery method(s):	PDF API Excel Power BI
Assessment code:	1439627-8-5

Coal, Thermal, imp, spot, cif, South Korea

Specification:	thermal coal used in steam generation for electricity production or process heating, with 6,000 kcal/kg NAR
Typical packing:	bulk
Density Net calorific value:	855 kg/m3 30 GJ/mt
Pricing type Market:	spot import
Incoterm Location:	cif South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Pricing model:	Freight Based Calculation
Assessment chart legend:	Coal (Thermal), imp, KR
Final Forecast:	Jan/07-Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	191601-8-5

Crude Oil, imp, spot, cfr, South Korea

Typical specification:	light and heavy crude oils, with high sulfur (sour) or low sulfur (sweet) levels
Typical packing:	bulk
Density Net calorific value:	863 kg/m ³ 45 GJ/mt
Pricing type Market:	spot import
Incoterm Location:	cfr South Korea
Currency Quantity unit:	South Korean Won oil barrel (Bbl)
Pricing model:	Freight Based Calculation
Assessment chart legend:	Crude Oil, imp, KR
Final Forecast:	Jan/07-Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	492512-8-5

Diesel, exp, transaction, fob, South Korea

Typical specification:	high, low and ultra-low sulfur diesel
Typical packing:	bulk
Density Net calorific value:	832 kg/m ³ 45 GJ/mt
Pricing type Market:	transaction export
Incoterm Location:	fob South Korea
Currency Quantity unit:	South Korean Won cubic meter (m ³)
Pricing model:	Trade Based Calculation
Assessment chart legend:	Diesel, exp, KR
Final Preliminary Forecast:	Jan/07-Aug/25 Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	812541-8-5

Diesel, ret, South Korea

Typical specification:	high, low and ultra-low sulfur diesel
Packing:	bulk at the pump
Density Net calorific value:	832 kg/m ³ 45 GJ/mt
Market:	retail
Location:	South Korea
Currency Quantity unit:	South Korean Won cubic meter (m ³)
Pricing model:	Compiled Prices
Assessment chart legend:	Diesel, ret, KR
Final Forecast:	Jan/07-Sep/25 No forecast
Delivery method(s):	PDF API Excel Power BI
Assessment code:	1926328-8-5

Electricity, hho, South Korea

Specification:	electricity purchased by domestic customers (band voltage < 400 V)
Market:	household
Location:	South Korea
Currency Quantity unit:	South Korean Won kilowatt hour (kWh)
Pricing model:	Compiled Prices
Assessment chart legend:	Electricity, hho, KR
Final Forecast:	Jan/07-Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	6220015-8-5
Remarks:	for consumption up to 300 kWh/month

Electricity, ind, South Korea

Typical specification:	high voltage
Market:	industrial sector
Location:	South Korea
Currency Quantity unit:	South Korean Won kilowatt hour (kWh)
Pricing model:	Compiled Prices
Assessment chart legend:	Electricity, ind, KR
Final Forecast:	Jan/00-Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	101598-8-5
Remarks:	including generation, transmission, and distribution costs, plus taxes

Ethanol, Anhyd, imp, spot, cif, South Korea

Typical specification:	anhydrous denatured fuel-grade ethanol
Typical packing:	bulk
Density Net calorific value:	789 kg/m ³ 27 GJ/mt
Pricing type Market:	spot import
Incoterm Location:	cif South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Pricing model:	Freight Based Calculation
Assessment chart legend:	Ethanol (Anhyd), imp, KR
Final Forecast:	Jan/07-Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	292572-8-5

Fuel Oil, HFO, whl, spot, ddp, South Korea

Typical specification:	heavy fuel oil, no.6
Typical packing:	bulk
Density Net calorific value:	944 kg/m ³ 40.7 GJ/mt
Pricing type Market:	spot wholesale
Incoterm Location:	ddp South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Pricing model:	Compiled Prices
Assessment chart legend:	Fuel Oil (HFO), whl, KR
Final Preliminary Forecast:	Jan/07-Aug/25 Sep/25 No forecast
Delivery method(s):	PDF API Excel Power BI
Assessment code:	6227885-8-5

Fuel Oil, IFO, imp, spot, cif, South Korea

Typical specification:	intermediate fuel oil, 180 cst
Typical packing:	bulk
Density Net calorific value:	991 kg/m ³ 40.7 GJ/mt
Pricing type Market:	spot import
Incoterm Location:	cif South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Pricing model:	Freight Based Calculation
Assessment chart legend:	Fuel Oil (IFO), imp, KR
Final Forecast:	Jan/07-Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	092603-8-5

Fuel Oil, LFO, ret, South Korea

Specification:	heating oil(light fuel oil)
Typical packing:	portable container
Density Net calorific value:	810 kg/m ³ 40.7 GJ/mt
Market:	retail
Location:	South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Pricing model:	Compiled Prices
Assessment chart legend:	Fuel Oil (LFO), ret, KR
Final Forecast:	Jan/07-Sep/25 No forecast
Delivery method(s):	PDF API Excel Power BI
Assessment code:	1427882-8-5

Gasoline, Premium, ret, South Korea

Typical specification:	95-98 RON, lead content < 0,013 g/l
Packing:	bulk at the pump
Density Net calorific value:	753 kg/m ³ 44.8 GJ/mt
Market:	retail
Location:	South Korea
Currency Quantity unit:	South Korean Won cubic meter (m ³)
Pricing model:	Compiled Prices
Assessment chart legend:	Gasoline (Premium), ret, KR
Final Forecast:	Jan/07-Sep/25 No forecast
Delivery method(s):	PDF API Excel Power BI
Assessment code:	5226329-8-5

Gasoline, Regular, ret, South Korea

Typical specification:	regular gasoline (87 octane/ 91-92 RON)
Packing:	bulk at the pump
Density Net calorific value:	735 kg/m ³ 44.8 GJ/mt
Market:	retail
Location:	South Korea
Currency Quantity unit:	South Korean Won cubic meter (m ³)
Pricing model:	Compiled Prices
Assessment chart legend:	Gasoline (Regular), ret, KR
Final Forecast:	Jan/07-Sep/25 No forecast
Delivery method(s):	PDF API Excel Power BI
Assessment code:	4327881-8-5

Gasoline, exp, transaction, fob, South Korea

Typical specification:	regular gasoline (87 octane/ 91-92 RON); mid-grade gasoline (89 octane/ 93-94 RON); premium gasoline (91-93 octane/ 95-98 RON)
Typical packing:	bulk
Density Net calorific value:	750 kg/m ³ 44.8 GJ/mt
Pricing type Market:	transaction export
Incoterm Location:	fob South Korea
Currency Quantity unit:	South Korean Won cubic meter (m ³)
Pricing model:	Trade Based Calculation
Assessment chart legend:	Gasoline, exp, KR
Final Preliminary Forecast:	Jan/07-Aug/25 Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	812622-8-5

Kerosene, jet, exp, transaction, fob, South Korea

Typical specification:	jet fuel, kerosene type
Typical packing:	bulk
Density Net calorific value:	758 kg/m ³ 44.6 GJ/mt
Pricing type Market:	transaction export
Incoterm Location:	fob South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Pricing model:	Trade Based Calculation
Assessment chart legend:	Kerosene (jet), exp, KR
Final Preliminary Forecast:	Jan/07-Aug/25 Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	312662-8-5

LPG, whl, spot, ddp, South Korea

Typical specification:	liquified petroleum gas, mixtures of propane, butane and isobutane
Typical packing:	bulk
Density Net calorific value:	542 kg/m ³ 46.1 GJ/mt
Pricing type Market:	spot wholesale
Incoterm Location:	ddp South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Pricing model:	Compiled Prices
Assessment chart legend:	LPG, whl, KR
Final Forecast:	Jan/07-Sep/25 No forecast
Delivery method(s):	PDF API Excel Power BI
Assessment code:	5827883-8-5

Naphtha, Heavy, imp, spot, cfr, South Korea

Typical specification:	heavy naphtha with min. 65% paraffin content and a typical density between 0.65 and 0.74 kg/l
Typical packing:	bulk
Density Net calorific value:	713 kg/m ³ 45.3 GJ/mt
Pricing type Market:	spot import
Incoterm Location:	cfr South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Pricing model:	Freight Based Calculation
Assessment chart legend:	Naphtha (Heavy), imp, KR
Final Forecast:	Jan/07-Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	682788-8-5

Natural Gas, LNG, imp, spot, cif, South Korea

Typical specification:	natural gas commercialized in liquified state
Typical packing:	bulk
Density Net calorific value:	455 kg/m ³ 52.2 GJ/mt
Pricing type Market:	spot import
Incoterm Location:	cif South Korea
Currency Quantity unit:	South Korean Won million British Thermal Unit (MMBtu)
Pricing model:	Freight Based Calculation
Assessment chart legend:	Natural Gas (LNG), imp, KR
Final Forecast:	Jan/07-Sep/25 Oct/25-Mar/26
Delivery method(s):	PDF API Excel Power BI
Assessment code:	281554-8-5

Propane, imp, spot, cif, South Korea

Specification:	liquid propane with purity equal or greater than 90 vol%
Typical packing:	bulk
Density Net calorific value:	494 kg/m ³ 46.3 GJ/mt
Pricing type Market:	spot import
Incoterm Location:	cif South Korea
Currency Quantity unit:	South Korean Won metric ton (mt)
Pricing model:	Freight Based Calculation

Market Analysis Assessments

Demand, Biofuels and Waste, South Korea

Energy source:	Biofuels and Waste
Market flow Country:	Demand South Korea
Quantity unit(s):	gigawatt hour (GWh) petajoule (PJ)
Assessment period:	Jan/10-May/25
Delivery method(s):	PDF
Assessment code:	0031884-8-5

Demand, Coal, South Korea

Energy source:	Coal
Density:	1,500 kg/m3
Market flow Country:	Demand South Korea
Quantity unit(s):	million metric ton (MMT) petajoule (PJ)
Assessment period:	Jan/10-May/25
Delivery method(s):	PDF
Assessment code:	5331883-8-5

Demand, Electricity, South Korea

Energy source:	Electricity
Market flow Country:	Demand South Korea
Quantity unit(s):	gigawatt hour (GWh) petajoule (PJ)
Assessment period:	Jan/10-May/25
Delivery method(s):	PDF
Assessment code:	9131880-8-5

Demand, Geothermal, Solar, Wind, etc, South Korea

Energy source:	Geothermal, Solar, Wind, etc
Market flow Country:	Demand South Korea
Quantity unit(s):	gigawatt hour (GWh) petajoule (PJ)
Assessment period:	Jan/10-May/25
Delivery method(s):	PDF
Assessment code:	0231877-8-5

Demand, Hydro, South Korea

Energy source:	Hydro
Market flow Country:	Demand South Korea
Quantity unit(s):	gigawatt hour (GWh) petajoule (PJ)
Assessment period:	Jan/10-May/25
Delivery method(s):	PDF
Assessment code:	5531876-8-5

Demand, Natural Gas, South Korea

Energy source:	Natural Gas
Density:	0.7 kg/m3
Market flow Country:	Demand South Korea
Quantity unit(s):	Percent (%) petajoule (PJ)
Assessment period:	Jan/10-May/25
Delivery method(s):	PDF
Assessment code:	3631872-8-5

Demand, Nuclear, South Korea

Energy source:	Nuclear
Market flow Country:	Demand South Korea
