## Licensed Materials

### Content & Data

Data, information, analyses and/or models presented in the Licensed Materials are prepared on the basis of publicly available information and non-confidential information disclosed by third parties. Third parties, including, but not limited to technology licensors, trade associations or marketplace participants, may have provided some of the information on which the analyses or data are based.

The analyses presented in the Licensed Materials are developed independently by Intratec and, as such, are the opinion of Intratec and do not represent the point of view of any third parties nor imply in any way that they have been approved or otherwise authorized by third parties.

Intratec conducts analyses and prepares Licensed Materials for Clients and Authorized Users in conformance with generally accepted professional standards. Changes in factors upon which information, data and/or analyses presented in the Licensed Materials are based could affect the respective information, data and/or analyses. Unforeseeable events or combinations of unforeseeable events, such as actions of marketplace participants, third parties and governments, make forecasts presented in the Licensed Materials inherently uncertain.

Although the statements in the Licensed Materials are derived from or based on several sources that Intratec believe to be reliable, Intratec does not guarantee their accuracy, reliability, or quality; any such information, or resulting analyses, may be incomplete, inaccurate or condensed. All information, data and estimates included in the Licensed Materials are subject to change (e.g. data corrections, data series replacements), discontinuation and/or removal without notice. The Licensed Materials are for informational purposes only and are not intended to or should not be construed as advice or recommendations of any nature whatsoever.

Client or Authorized User agrees it will not, without prior written consent of Intratec, represent, directly or indirectly, that Intratec Licensed Materials have been approved or endorsed by the other parties. In no event shall Intratec, its employees, representatives, resellers or distributors be liable to Client, Authorized User or any other person or entity for any direct, indirect, special, exemplary, punitive, or consequential damages, including lost profits, based on breach of warranty, contract, negligence, strict liability or otherwise, arising from the use of Licensed Materials, whether or not they or it had any knowledge, actual or constructive, that such damages might be incurred.
